

Wolf Eyes Dingo Red LED Headlamp

Distribution for West & East Malaysia

Marketed & distributed by:
The Beach Collective Communications & Ventures

Product Description

This RED version of the Dingo LED headlamp is usually chosen by those who work near animals, zoo workers, academics, wildlife photographers or vermin control as the RED LED light upsets the animals considerably less than white light. It is also great if you don't want to lose your own night vision!

There is a **long distance tele lens** perfect for hunting, it provides a spot to highlight wild dogs or foxes into the distance. This lens is adjustable by sliding from spot to a flood from 11 degrees to 50 degrees. Also in the kit is a **wide angle lens**, this produces a very broad spot out to shorter distances, say 40 metres, perfect for someone tasked with supervising a storage yard, emergency services or for chasing bunnies.

The Dingo rechargeable headlamp can also be used in **No Lens mode at night**. This provides a very, very even light over about 160 degrees with no spot. If you work close to others, have to walk around a medical facility or similar without disturbing others, the no lens mode with red is just fantastic.

Product Description

All the controls for the headlamp are on the front of the Dingo, for easy access and positive control. **There are 4 levels (High, Medium, MediumLow, Low) and strobe**, all easily accessed by twisting the front bezel. The bezel can also be slid forward and back to control focus of the two lenses. The headlamp bezel can also be tilted easily by the user. Every controls is in front for safety and more control by the user of the headlamp.

The Wolf Eyes rechargeable battery provides **150 minutes of runtime on High, 295 minutes on Medium, 17 hours on Medium Low and 136 hours on Low**. Being a lithium ion rechargeable battery it also works in sub zero conditions.

Product Highlights

Manufacturing:

- Australian Brand
- Military and police-grade equipment

Capabilities:

- **Night vision:** Red light enhances night vision capability
- **Red LED:** No filter required so no dimming of the light
- **Splashproof:** Due to an innovative glass cover over the LED
- **No fade:** Headlamp is regulated, so the light doesn't fade when in use.

Product Highlights

Construction:

- **Aircraft grade aluminium:** The front bezel is constructed of **aircraft grade aluminium** with cooling fins built in so you don't overheat your LED -- If an LED is overheated it has a permanently reduced output

Modes of use:

- **5 stages mode:** low (2%), Medium low (10%), Medium (50%), High (100%), Strobe (1Hz)

Usage:

- Research, Boating, Training, Running, Camping & Hiking, Fishing, Outdoor Lifestyle, Hunting, Astronomy
